CP-085 - Touch screen (HMI)

Product Code: CP-085
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

CP-085 Touch Screen 10" HMI **(This component need to be programmed in the factory according to Equipment Type, Model and Serial Number)**

The HMI (human-machine interface), often also called Touch Screen, is the user interface that connects the operator to the controller for the Vianord system. The HMI translates data from the industrial control systems (the PLC) into human-readable visual representations of the systems. Through the HMI, the operator can operate the machine while a Technician can see schematics of the systems and turn switches and pumps on or off, for example, or raise or lower temperatures.
