

CH-021 - Pre-Heating resistor

Product Code: CH-021

Weight: 0.00kg

Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

CH-021 Pre-Heating Resistor

Quartz heating is a type of radiant heating, commonly referred to as short-wave infrared heating. The tubes are manufactured from quartz glass (fused silica), which protect and support the heating coils. They provide efficient transmission of infra-red radiation, good resistance to chemical and contamination.

Heating coils are wound in various grades of iron-chrome-aluminium alloys to match the applications and operating conditions, and typically generate radiant emission in the short to medium wavelength range.

Equipment Ref

812 Ref **R2** - pre-heating
