

## CH-025 - Heating resistor

**Product Code:** CH-025

**Weight:** 0.00kg

**Dimensions:** 1,046.00mm x 8.00mm x  
12.00mm

### Description

**CH-025 Heating resistor quartz** (no longer in use)

Replaced by CH-810

Quartz heating is a type of radiant heating, commonly referred to as short-wave infrared heating. The tubes are manufactured from quartz glass (fused silica), which protect and support the heating coils. They provide efficient transmission of infra-red radiation, good resistance to chemical and contamination.

Heating coils are wound in various grades of iron-chrome-aluminium alloys to match the applications and operating conditions, and typically generate radiant emission in the short to medium wavelength range.

### Equipment Reference

810 for Hot Roll (Made in Italy)

### Specification

|                      |  |
|----------------------|--|
| Spare Part Type      |  |
| Electrical Component |  |
| Spare Part Group     |  |
| Heater               |  |
| Stock Type           |  |
| Standard Stock       |  |
