

CH-024 - Heating resistor

Product Code: CH-024
Weight: 0.00kg
Dimensions: 0.00cm x 0.00cm x 0.00cm

Description

CH-024 Heating Resistor

Quartz heating is a type of radiant heating, commonly referred to as short-wave infrared heating. The tubes are manufactured from quartz glass (fused silica), which protect and support the heating coils. They provide efficient transmission of infra-red radiation, good resistance to chemical and contamination.

Heating coils are wound in various grades of iron-chrome-aluminium alloys to match the applications and operating conditions, and typically generate radiant emission in the short to medium wavelength range.

Equipment Ref
812 Ref **R1** - heating
